

We will have some tools on site to borrow, and a few sets of saw horses but if you have your own tools, please bring them. Tuning and setting up tools can be time consuming, and this greatly saves time.

So here is an extended list of tools needed for each Skin on Frame built in class:

- 2 sawhorses to support the SOF during construction (we have some for those coming a distance.)
- 1 small saw mainly for cutting (small Japanese saws work fine)
- 1 small surface/block plane
- 1 spokeshave
- 1 hammer
- 1 pair of pliers to pull out little temporary nails
- 1 combination or tri-square
- 1 adjustable T-Bevel- for drawing different angles
- a battery powered cordless drill. Light duty is fine.
- knife, Anders will have [Mora Knives](#) available for purchase
- pencils
- cabinet scraper and/or sand paper 80 and 120 grit
- 3-6' pieces of medium thickness rope or 3 kayak straps for holding down your kayak to the sawhorses
- as many little clamps as possible
